

SUT Cellular Concrete

Foam Generator Controller (For Cellular Concrete)

The Cellular Concrete has been developed by adding the foam into the concrete mortar. The generated foam itself is a chemical process by adding the foaming agent and required the Generator machine to produce the foam. The CLC is the mixture of the foam with mortar, the small bubble in the mixture will make the concrete light weight. The foaming concrete is coagulated and setting with holes of air bubbles.

Specification;

- Adjustable density of foam.
- Automatic time setting to off the motor.
- 4 Digital foam generator.
- Power motor single phase 1 Hp.
- Foam output 0.1338 kq/min.
- Ratio of foam volume per air 1.
- Pad mix design & tank of chemical size 200 liter
- Pressure gauge with filter regulator.

Infinity Concrete Technology Co.,Ltd. **Manufacturer of Foam Concrete Machinery & Chemical**

Head Office;

170 Moo1, Nai Mueang,
Mueang Chaiyaphum,
Chaiyaphum 36000 Thailand.

Factory;

67/2 Moo1, Nai Mueang,
Mueang Chaiyaphum,
Chaiyaphum 36000 Thailand.
