

SUT Cellular Concrete

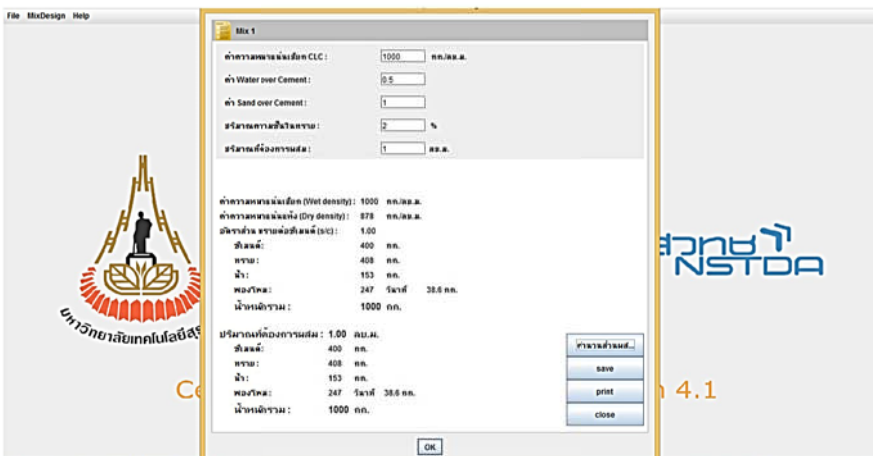

Mix Design Program (For Cellular Concrete)

Nomally how to mixed the cellular light-weight concret must depend on fomula of Mix Design Program to adjust various material in a appropriate ratio. So, our company tried to develop Mix Design Program for distribute to another member not only paper of formula Mix Design. For Mix Design Program helped design the density of cellular light-weight concrete and can be design the weight of cellular light-weight concrete for maching with each typed of requirment to used such want to make the decoration no need high density or want to make construction materials need high density it's can setting at Mix Design Program.

Properties;

- Used mix design standard ACI and ASTM of cellular light-weight concrete.
- Easy to use.
- Compatible with all operating system (windows, linux)
- Can show report through for both motor and printer or sent to Excel.
- We have been develop whole systems users can be cevtain that this program will be adapt to new design in the future.

Infinity Concrete Technology Co.,Ltd. Manufacturer of Foam Concrete Machinery & Chemical
